

# Items For Sale

## FOR SALE

D'Arbonne Water System has 4 of each of the following items that we would love to sell--even if it is at a discounted price. We got them when we were going to do chloramines and then could not return them. If you know of any systems that are using chloramines or who are having to add them.

- 4 Ea. Prominent chemical metering pump with engineered skid containment system
- 4 Ea. Removable lid for access to chemical taps
- 1 Ea. Nitrification Plan for LA DHH for chloramine disinfection treatment conversion

For more information, you can contact Stephanie Walker at 318-285-7407
